

SANIYA CHHABRA

AI Engineer | Machine Learning & Generative AI

Delhi, India | +91-9667095490 | saniyachhabra3@gmail.com | LinkedIn | GitHub

SUMMARY

AI/Data Science undergraduate (CGPA 9.1/10) with hands-on experience building LLM-powered applications — RAG pipelines, multi-agent systems, and multimodal assistants — alongside classical ML pipelines for classification and fraud detection. Proven ability to take models from prototype to working, evaluated systems.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, SQL

AI/ML & GenAI: LangChain, RAG, AI Agents, LLMs, PyTorch, Scikit-learn, XGBoost, GANs

Data Science: Pandas, NumPy, EDA, Feature Engineering, Tableau

Tools & Platforms: Flask, Streamlit, Docker, Git/GitHub, Google Cloud, MongoDB

EXPERIENCE

Data Science Intern | *Alfido Tech* 2025

- Cleaned and transformed 10,000+ rows of raw data, improving input quality for downstream ML models.
- Built and compared three predictive models (Logistic Regression, Random Forest, XGBoost); XGBoost reached 90% accuracy on the held-out test set.
- Designed interactive Python visualizations to surface customer trends, cutting manual analysis time by 30%.

Data Science Intern | *SkillCraft Technology* 2025

- Applied feature engineering and preprocessing to a ~20,000-record real-world dataset ahead of model training.
- Built and validated classification models achieving ~88% test accuracy.
- Automated the data-cleaning pipeline, reducing manual preprocessing effort by 40%.

PROJECTS

AI Learning Assistant — Teaching Agent Suite | github.com/Saniya0301/AI-Learning-Assistant

- Built an interactive Flask + Groq LLM app that turns any topic into a structured "Key Concepts" breakdown and a beginner-to-expert learning roadmap.
- Designed the prompt pipeline and Tailwind CSS frontend to deliver clean, structured reports in real time, keeping output format consistent across arbitrary user-input topics.

AI Medical Chatbot 2.0 | github.com/Saniya0301/AI-powered-Medical-Chatbot

- Built a multimodal healthcare chatbot combining Meta Llama 3 Vision 90B (image/text understanding), OpenAI Whisper (speech-to-text), and ElevenLabs (text-to-speech) in a Gradio interface.
- Implemented a LangChain RAG pipeline to ground responses in reliable medical sources, handling 100+ query variations.

Multimodal AI Coding Agent Team (o3-mini + Gemini) | github.com/Saniya0301/Multimodal-AI-Coding-Agent-Team-with-o3-mini-and-Gemini

- Built a multi-agent Streamlit app where a Gemini 2.0 Flash vision agent parses coding problems (image or text) and an o3-mini agent generates documented Python solutions.
- Integrated E2B secure sandbox execution so every generated solution is run and verified automatically before being returned, eliminating manual correctness checks.

AI Resume Intelligence Platform | github.com/Saniya0301/AI-Resume-Intelligence-platform

- Built an LLM-powered platform that parses resumes and job descriptions to score candidate-role fit and surface skill/keyword gaps.
- Designed the extraction pipeline to convert unstructured resume text into structured, comparable fields for consistent, explainable scoring against a target role.

CERTIFICATIONS & TRAINING

- Microsoft — Introduction to Generative AI Concepts (July 2025)
- Google Cloud — Generative AI Introduction
- IBM — Data Science & Machine Learning
- Microsoft — Introduction to AI
- AI & ML Virtual Training, InternCourse (2025) — end-to-end ML workflows across 3 classification/clustering projects; improved predictive accuracy by 15% via feature selection and optimization.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

Guru Gobind Singh Indraprastha University, Delhi

CGPA: 9.1/10 (through 6th semester) | 2023 – Present
